

Properties

Divisibility
Comparability
Connectivity
Disturbability
Reorderability
Substitutability
Satisfiability

Can't a property that is identified through a donkey also be identified through a jasmine?

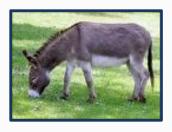

What are the properties that can be identified through both?

- Are they divisible?
- Are they comparable?
- Are they connectable?
- Are they disturbable?

- ❖Are they reorderable?
- Are they substitutable?
- Are they satisfiable?

Properties

Divisibility
Comparability
Connectivity
Disturbability
Reorderability
Substitutability
Satisfiability

Can't a property that is identified through a donkey also be identified through a tulip?

What are the properties that can be identified through both?

- Are they divisible?
- Are they comparable?
- Are they connectable?
- Are they disturbable?

- ❖Are they reorderable?
- Are they substitutable?
- Are they satisfiable?

Properties

Divisibility
Comparability
Connectivity
Disturbability
Reorderability
Substitutability
Satisfiability

Can't a property that is identified through a donkey also be identified through a lotus?

What are the properties that can be identified through both?

- Are they divisible?
- Are they comparable?
- Are they connectable?
- Are they disturbable?

- ❖Are they reorderable?
- Are they substitutable?
- Are they satisfiable?

Properties

Divisibility
Comparability
Connectivity
Disturbability
Reorderability
Substitutability
Satisfiability

Can't a property that is identified through a donkey also be identified through a woman?

What are the properties that can be identified through both?

- Are they divisible?
- Are they comparable?
- Are they connectable?
- Are they disturbable?

- ❖Are they reorderable?
- Are they substitutable?
- Are they satisfiable?

Properties

Divisibility
Comparability
Connectivity
Disturbability
Reorderability
Substitutability
Satisfiability

Can't a property that is identified through a donkey also be identified through a man?

What are the properties that can be identified through both?

- Are they divisible?
- Are they comparable?
- Are they connectable?
- Are they disturbable?

- ❖Are they reorderable?
- Are they substitutable?
- Are they satisfiable?

Properties

Divisibility
Comparability
Connectivity
Disturbability
Reorderability
Substitutability
Satisfiability

Can't a property that is identified through a donkey also be identified through a dog?

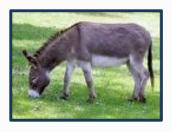

What are the properties that can be identified through both?

- Are they divisible?
- Are they comparable?
- Are they connectable?
- Are they disturbable?

- ❖Are they reorderable?
- Are they substitutable?
- Are they satisfiable?

Properties

Divisibility
Comparability
Connectivity
Disturbability
Reorderability
Substitutability
Satisfiability

Can't a property that is identified through a donkey also be identified through a leaf?

What are the properties that can be identified through both?

- Are they divisible?
- Are they comparable?
- Are they connectable?
- Are they disturbable?

- ❖Are they reorderable?
- Are they substitutable?
- Are they satisfiable?

Properties

Divisibility
Comparability
Connectivity
Disturbability
Reorderability
Substitutability
Satisfiability

Can't a property that is identified through a donkey also be identified through a fruit?

What are the properties that can be identified through both?

- Are they divisible?
- Are they comparable?
- Are they connectable?
- Are they disturbable?

- Are they reorderable?
- Are they substitutable?
- Are they satisfiable?

Properties

Divisibility
Comparability
Connectivity
Disturbability
Reorderability
Substitutability
Satisfiability

Can't a property that is identified through a donkey also be identified through a tree?

What are the properties that can be identified through both?

- Are they divisible?
- Are they comparable?
- Are they connectable?
- Are they disturbable?

- ❖Are they reorderable?
- Are they substitutable?
- Are they satisfiable?

Properties

Divisibility
Comparability
Connectivity
Disturbability
Reorderability
Substitutability
Satisfiability

Can't a property that is identified through a donkey also be identified through a tiger?

What are the properties that can be identified through both?

- Are they divisible?
- Are they comparable?
- Are they connectable?
- Are they disturbable?

- ❖Are they reorderable?
- Are they substitutable?
- Are they satisfiable?

Properties

Divisibility
Comparability
Connectivity
Disturbability
Reorderability
Substitutability
Satisfiability

Can't a property that is identified through a donkey also be identified through a fish?

What are the properties that can be identified through both?

- Are they divisible?
- Are they comparable?
- Are they connectable?
- Are they disturbable?

- ❖Are they reorderable?
- Are they substitutable?
- Are they satisfiable?

Properties

Divisibility
Comparability
Connectivity
Disturbability
Reorderability
Substitutability
Satisfiability

Can't a property that is identified through a donkey also be identified through a cow?

What are the properties that can be identified through both?

- Are they divisible?
- Are they comparable?
- Are they connectable?
- Are they disturbable?

- ❖Are they reorderable?
- Are they substitutable?
- Are they satisfiable?

Properties

Divisibility
Comparability
Connectivity
Disturbability
Reorderability
Substitutability
Satisfiability

Can't a property that is identified through a donkey also be identified through a cat?

What are the properties that can be identified through both?

- Are they divisible?
- Are they comparable?
- Are they connectable?
- Are they disturbable?

- ❖Are they reorderable?
- Are they substitutable?
- Are they satisfiable?

Properties

Divisibility
Comparability
Connectivity
Disturbability
Reorderability
Substitutability
Satisfiability

Can't a property that is identified through a donkey also be identified through a heart?

What are the properties that can be identified through both?

- Are they divisible?
- Are they comparable?
- Are they connectable?
- Are they disturbable?

- ❖Are they reorderable?
- Are they substitutable?
- Are they satisfiable?

Properties

Divisibility
Comparability
Connectivity
Disturbability
Reorderability
Substitutability
Satisfiability

Can't a property that is identified through a donkey also be identified through a breast?

What are the properties that can be identified through both?

- Are they divisible?
- Are they comparable?
- Are they connectable?
- Are they disturbable?

- ❖Are they reorderable?
- Are they substitutable?
- Are they satisfiable?

Properties

Divisibility
Comparability
Connectivity
Disturbability
Reorderability
Substitutability
Satisfiability

Can't a property that is identified through a donkey also be identified through a brain?

What are the properties that can be identified through both?

- Are they divisible?
- Are they comparable?
- Are they connectable?
- Are they disturbable?

- ❖Are they reorderable?
- Are they substitutable?
- Are they satisfiable?

Properties

Divisibility
Comparability
Connectivity
Disturbability
Reorderability
Substitutability
Satisfiability

Can't a property that is identified through a donkey also be identified through a lip?

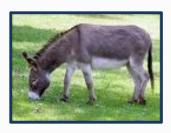

What are the properties that can be identified through both?

- Are they divisible?
- Are they comparable?
- Are they connectable?
- ❖ Are they disturbable?

- ❖Are they reorderable?
- Are they substitutable?
- Are they satisfiable?

Properties

Divisibility
Comparability
Connectivity
Disturbability
Reorderability
Substitutability
Satisfiability

Can't a property that is identified through a donkey also be identified through a mountain?

What are the properties that can be identified through both?

- Are they divisible?
- Are they comparable?
- Are they connectable?
- Are they disturbable?

- ❖Are they reorderable?
- Are they substitutable?
- Are they satisfiable?

Properties

Divisibility
Comparability
Connectivity
Disturbability
Reorderability
Substitutability
Satisfiability

Can't a property that is identified through a donkey also be identified through a lake?

What are the properties that can be identified through both?

- Are they divisible?
- Are they comparable?
- Are they connectable?
- Are they disturbable?

- ❖Are they reorderable?
- Are they substitutable?
- Are they satisfiable?

Properties

Divisibility
Comparability
Connectivity
Disturbability
Reorderability
Substitutability
Satisfiability

Can't a property that is identified through a donkey also be identified through a sky?

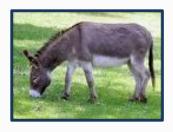

What are the properties that can be identified through both?

- Are they divisible?
- Are they comparable?
- Are they connectable?
- Are they disturbable?

- Are they reorderable?
- Are they substitutable?
- Are they satisfiable?

Properties

Divisibility
Comparability
Connectivity
Disturbability
Reorderability
Substitutability
Satisfiability

Can't a property that is identified through a donkey also be identified through a moon?

What are the properties that can be identified through both?

- Are they divisible?
- Are they comparable?
- Are they connectable?
- Are they disturbable?

- ❖Are they reorderable?
- Are they substitutable?
- Are they satisfiable?

Properties

Divisibility
Comparability
Connectivity
Disturbability
Reorderability
Substitutability
Satisfiability

Can't a property that is identified through a donkey also be identified through Sun?

What are the properties that can be identified through both?

- Are they divisible?
- Are they comparable?
- Are they connectable?
- Are they disturbable?

- ❖Are they reorderable?
- Are they substitutable?
- Are they satisfiable?

Properties

Divisibility
Comparability
Connectivity
Disturbability
Reorderability
Substitutability
Satisfiability

Can't a property that is identified through a donkey also be identified through sand?

What are the properties that can be identified through both?

- Are they divisible?
- Are they comparable?
- Are they connectable?
- Are they disturbable?

- ❖Are they reorderable?
- Are they substitutable?
- Are they satisfiable?

Properties

Divisibility
Comparability
Connectivity
Disturbability
Reorderability
Substitutability
Satisfiability

Can't a property that is identified through a donkey also be identified through an atom?

What are the properties that can be identified through both?

- Are they divisible?
- Are they comparable?
- Are they connectable?
- Are they disturbable?

- ❖Are they reorderable?
- Are they substitutable?
- Are they satisfiable?

Properties

Divisibility
Comparability
Connectivity
Disturbability
Reorderability
Substitutability
Satisfiability

Can't a property that is identified through a donkey also be identified through an egg?

What are the properties that can be identified through both?

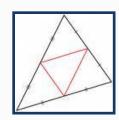

- Are they divisible?
- Are they comparable?
- Are they connectable?
- Are they disturbable?

- ❖Are they reorderable?
- Are they substitutable?
- Are they satisfiable?

Properties

Divisibility
Comparability
Connectivity
Disturbability
Reorderability
Substitutability
Satisfiability

Can't a property that is identified through a donkey also be identified through a triangle?

What are the properties that can be identified through both?

- Are they divisible?
- Are they comparable?
- Are they connectable?
- Are they disturbable?

- ❖Are they reorderable?
- Are they substitutable?
- Are they satisfiable?

Properties

Divisibility
Comparability
Connectivity
Disturbability
Reorderability
Substitutability
Satisfiability

Can't a property that is identified through a donkey also be identified through a pyramid?

What are the properties that can be identified through both?

- Are they divisible?
- Are they comparable?
- Are they connectable?
- Are they disturbable?

- Are they reorderable?
- Are they substitutable?
- Are they satisfiable?

Properties

Divisibility
Comparability
Connectivity
Disturbability
Reorderability
Substitutability
Satisfiability

Can't a property that is identified through a donkey also be identified through a transistor?

What are the properties that can be identified through both?

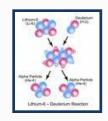

- Are they divisible?
- Are they comparable?
- Are they connectable?
- Are they disturbable?

- ❖Are they reorderable?
- Are they substitutable?
- Are they satisfiable?

Properties

Divisibility
Comparability
Connectivity
Disturbability
Reorderability
Substitutability
Satisfiability

Can't a property that is identified through a donkey also be identified through a reaction?

What are the properties that can be identified through both?

- Are they divisible?
- Are they comparable?
- Are they connectable?
- Are they disturbable?

- ❖Are they reorderable?
- Are they substitutable?
- Are they satisfiable?

Properties

Divisibility
Comparability
Connectivity
Disturbability
Reorderability
Substitutability
Satisfiability

Can't a property that is identified through a donkey also be identified through a rocket?

What are the properties that can be identified through both?

- Are they divisible?
- Are they comparable?
- Are they connectable?
- Are they disturbable?

- ❖Are they reorderable?
- Are they substitutable?
- Are they satisfiable?

Properties

Divisibility
Comparability
Connectivity
Disturbability
Reorderability
Substitutability
Satisfiability

Can't a property that is identified through a donkey also be identified through a candle?

What are the properties that can be identified through both?

- Are they divisible?
- Are they comparable?
- Are they connectable?
- Are they disturbable?

- ❖Are they reorderable?
- Are they substitutable?
- Are they satisfiable?

Properties

Divisibility
Comparability
Connectivity
Disturbability
Reorderability
Substitutability
Satisfiability

Can't a property that is identified through a donkey also be identified through a society?

What are the properties that can be identified through both?

- Are they divisible?
- Are they comparable?
- Are they connectable?
- Are they disturbable?

- ❖Are they reorderable?
- Are they substitutable?
- Are they satisfiable?

Properties

Divisibility
Comparability
Connectivity
Disturbability
Reorderability
Substitutability
Satisfiability

Can't a property that is identified through a donkey also be identified through a family?

What are the properties that can be identified through both?

- Are they divisible?
- Are they comparable?
- Are they connectable?
- Are they disturbable?

- Are they reorderable?
- Are they substitutable?
- Are they satisfiable?

Properties

Divisibility
Comparability
Connectivity
Disturbability
Reorderability
Substitutability
Satisfiability

Can't a property that is identified through a donkey also be identified through an idea?

What are the properties that can be identified through both?

- Are they divisible?
- Are they comparable?
- Are they connectable?
- Are they disturbable?

- ❖Are they reorderable?
- Are they substitutable?
- Are they satisfiable?

Properties

Divisibility
Comparability
Connectivity
Disturbability
Reorderability
Substitutability
Satisfiability

Can't a property that is identified through a donkey also be identified through a disaster?

What are the properties that can be identified through both?

- Are they divisible?
- Are they comparable?
- Are they connectable?
- Are they disturbable?

- ❖Are they reorderable?
- Are they substitutable?
- Are they satisfiable?

Properties

Divisibility
Comparability
Connectivity
Disturbability
Reorderability
Substitutability
Satisfiability

Can't a property that is identified through a donkey also be identified through poverty?

What are the properties that can be identified through both?

- Are they divisible?
- Are they comparable?
- Are they connectable?
- Are they disturbable?

- ❖Are they reorderable?
- Are they substitutable?
- Are they satisfiable?

Towards Analytical Thinking ...

Properties

Divisibility
Comparability
Connectivity
Disturbability
Reorderability
Substitutability
Satisfiability

Can't a property that is identified through a one also be identified through any other one?

Can't a property that is identified through a thing also be identified through any other thing?

Research is the search to find whether the property identified through a one is common to all or not.

Is no property common?
